

Q.13) Write a Python program to reverse a number. Prompt the user for input.

```
def Reverse_num(n):  
    rev_num = 0  
    while n > 0:  
        digit = n % 10  
        rev_num = rev_num * 10 + digit  
        n //= 10  
    return rev_num
```

```
num = int(input("Enter a number: "))
```

```
rev_num = Reverse_num(num)  
print(f"The reversed number is: {rev_num}")
```
