

Q.10) Python program to find the sum of even numbers from N given numbers.

```
def sum_even_nos(numbers):  
    total = 0  
    for num in numbers:  
        if num % 2 == 0:  
            total += num  
    return total
```

```
n = int(input("Enter the number of elements: "))  
numbers = []
```

```
print(f"Enter {n} numbers:")  
for _ in range(n):  
    num = int(input())  
    numbers.append(num)
```

```
Even_Sum = sum_even_nos(numbers)  
print(f"The sum of even numbers is: {Even_Sum}")
```
